Implementation & Support Plans

Live Virtual & Hybrid Events

WHO IS i2i TECHNOLOGIES?

Professional services and support solving problems related to video communications.

20+ years' experience working virtually in video communications.

D**iverse set of skills, experiences, and interests** that enable us to help with all aspects of video communications.

Cost conscious delivery of services and solutions with a high level of attention to detail and ease of use.

Highly engaged team that cares about the individuals that we work with.

Collaborative mindset in forming true partnerships to help organizations, institutions, and individuals fully utilize their technology.

HOW CAN i2i TECHNOLOGIES HELP?

Provide hands-on training, modeling, and coaching through interactive video, webinars, and recordings.

Assist in the ongoing evaluation and analysis of best value video communication and collaboration tools.

Consult with leadership to upgrade and migrate existing room designs while maintaining consistency and continuing to meet the needs of staff and end users.

Partner on the design and implementation of new construction projects to promote consistent, flexible learning and collaborative workspaces.

Maintain alignment with organizational goals, especially as it relates to new, unified communication and collaboration technologies.

Design and manage live virtual and hybrid events with support from our implementation team.

Assess and correct existing integrated audio video solutions that have never worked as intended, focusing on ease of use.

Transform meeting rooms and learning spaces with minimal expense based on needs and challenges.

Create innovative video communication solutions that provide a simple, flexible, and dependable experience.

Remotely manage and support integrated audio video solutions.

Demonstrate effective collaboration using audio and video communication equipment and solutions.

Improve staff skills for communicating and presenting information across the organization.
